

**Trade Association Information
For
Facility Enforcement and Compliance Summary (FECS)**

American Chemistry Council (ACC) members are required to participate in the Responsible Care®, which is a commitment to improve performance in environmental protection, occupational safety and health protection, plant safety, product stewardship and logistics. They also commit to continuously improve dialog with their neighbors and the public, independent from legal requirements. All ACC members and Responsible Care® Partner companies have made CEO-level commitments to uphold the program elements. Members of ACC can be found here <http://www.americanchemistry.com/Membership/MemberCompanies> and ACC Responsible Care® Partner companies are listed here: <http://responsiblecare.americanchemistry.com/Partnership-Program/Partner-Companies.html>

Society of Chemical Manufacturers and Affiliates (SOCMA) active members are U.S. companies engaging in the manufacturing or handling or synthetic and organic chemicals. Active members have a mandatory requirement to participate in ChemStewards®, an environmental health, safety and security (EHS&S) management program designed for chemical facilities to meet the unique needs of batch, custom and specialty chemical industry. Members commit to Core Principles signed by CEO or President. SOCMA members can be found here <http://www.socma.com/assets/File/socma1/PDFfiles/membership/SOCMA-Member-List-for-print.pdf> ChemStewards® Certified Members have completed requirements of the EHS&S Management System Verification and they can be found here: <http://www.socma.com/ChemStewards/index.cfm?subSec=21>

American Petroleum Institute (API) members are producers, refiners, suppliers, pipeline operators and marine transportation companies, as well as service and supply companies that support all segments of the oil and gas industry. Their members are committed to develop and adhere to the highest level industry standards, protect the environment, and lead in health and safety performance. API develops many process safety standards, specifications, recommended practices, technical reports and codes (i.e. documents) for the oil and gas industry. API also makes available a Process Safety Site Assessment Program for its members. API members that have chosen to provide links to their websites are listed here: <http://www.api.org/globalitems/globalheaderpages/membership/api-member-companies>

American Fuels and Petrochemicals Manufacturers (AFPM) [the former National Petroleum Refiners Association (NRPA)] represents petroleum refiners and petrochemical manufacturers throughout the U.S. AFPM members can be found at <http://www.afpm.org/membership-directory/> AFPM in partnership with API promotes advancing process safety by providing industry opportunities to share knowledge and experience: <http://www.afpm.org/Advancing-Process-Safety-Programs/>

The Chlorine Institute, Inc. (CI) represents companies involved in safe production, use and distribution of chlorine, sodium and potassium hydroxides and sodium hypochlorite, and distribution and use of hydrogen chloride. CI is committed to the safe handling of these

chemicals and offers valuable resources to producers, distributors, packagers, users, and emergency responders. Search for CI member companies here: <http://www.cl2.com/about-us/company-directory.cfm> CI members are committed to adopting CI's safety and stewardship initiatives, including pamphlets, checklists, and incident sharing, that will assist members in achieving measurable improvement. At the core of its chlorine stewardship program is the Member Safety and Security Commitment. All CI member companies that produce, distribute or use chlorine annually certify that they will meet this commitment.

Institute of Ammonia Refrigeration (IIAR) IIAR provides advocacy, education, and standards for the benefit of the global community in the safe and sustainable design, installation and operation of ammonia and other natural refrigerant systems. IIAR provides process safety management guidelines, bulletins, standards, safety and training materials for ammonia refrigeration. IIAR members, including manufacturers, end users, and wholesalers of ammonia, are listed here: <https://www.iiar.org/join/MemberList.pdf>
